

"Try not to become a man of success, but rather try to become a man of value." - Albert Einstein
 Discuss this statement with its relevance in the present context.

Einstein prefers value over success, because success is just a temporary status whereas value guides man to remain happy with unswerving devotion.

Relevance of Value over Success in present context

Success became mantra for today's world. But don't understand what actually success is? Materialism (Car, Property), Power, Prestige, Money etc.

This chase of man to taste success is leading to disasters

Hence values are important for perminent
life not so called success

Thomas Alva Edison's value of Perseverance made
him to found Electricity. He enjoyed his working
and he was happy with his working. Had he focused
only on success, he would not have lived his life
happily by experimenting 1000 experiments.

Ratan Tata infact opines that success is not
achieving something and source of happiness. But it
is consubstantial phase of doing what we do in
right direction with good faith. (ie values)

Hence he says "Ethics (values) in Business is more
important than success in Business." Such can
be applicable to Men also.

Success is like a transient. Such dwindles
However adhering to values definitely brings
the probability of success in our favour.
