

(2) Inclusive growth is a politico-economic concept which aims to bring egalitarian growth in the society. It acknowledges that different model of development is required for a class of society having inequality as its base.

Thus, inclusive growth is a crux for Sustainable future →

- # Education develops quality (capacity) skilled human resource who can work on constructive activities for societal growth. Attitude of questioning and critical thinking with entrepreneurial mindset is essential.
- # Quality health to ensure cognitive health growth

and physique development -

Due nutritious food in order to fulfil basic need for survival.

Though programmes and policies might be there, accessibility and utility is less. E-gov to bridge the gap b/w beneficiaries & service providers

Thus Sussie Capital report has highlighted the fact that globally inequality is acutely increasing. This is manifested in wars, protection apathy to refugee, terrorism. Inclusive dev. is a key for sustainable society.
